

TechCorp Product Vision

Strategic Direction & Company Roadmap

Version: v2.1

Document: TC-PV-001

TechCorp Internal

1. Company Mission

TechCorp's mission is to empower businesses of every size with intelligent, reliable, and ethical AI-powered software solutions. We build technology that augments human capability, reduces operational friction, and creates measurable value across industries.

Mission Statement	Empowering businesses through intelligent AI-driven software
Founded	2019 — San Francisco, CA
Employees	340+ globally (Engineering, Product, Sales, Customer Success)
Markets	North America, Europe, Asia-Pacific

2. Vision

By 2030, TechCorp will be the world's most trusted platform for enterprise AI automation — enabling every organization to operate with the intelligence, speed, and precision of the best-run companies on earth.

3. Core Values

Value	Description
Integrity	We ship what we promise. No dark patterns, no hidden trade-offs.
User Empathy	Every feature decision starts with a real customer pain point.
Transparency	Open roadmaps, public changelogs, honest SLAs.
Excellence	We hold ourselves to a higher engineering and design standard.
Inclusion	Diverse teams build better products. No exceptions.

4. Target Customers

Segment	Size	Primary Need	Key Products
---------	------	--------------	--------------

Enterprise	1000+ employees	Scalable AI automation	AI Suite, RAG Platform
Mid-Market	100–999	Workflow efficiency	TechCorp Core
Startups	1–99	Fast go-to-market	API, SDK
Public Sector	Government	Compliance & security	GovCloud Edition

5. Product Portfolio

Product	Type	Status	Description
TechCorp Core	SaaS	GA	Workflow automation platform
TechCorp AI Suite	SaaS	GA	LLM-powered enterprise AI tools
RAG Platform	SaaS/API	Beta	Retrieval-Augmented Generation service
TechCorp SDK	Library	GA	Developer toolkit (Python, Node, Go)
GovCloud Edition	SaaS	GA	FedRAMP-ready deployment
Analytics Engine	SaaS	Roadmap	Real-time business intelligence

6. AI Strategy

TechCorp's AI strategy is built on three pillars: (1) best-in-class retrieval and reasoning via our RAG platform, (2) responsible deployment through safety-first model evaluation, and (3) continuous improvement through feedback loops and human-in-the-loop review.

- Multi-model orchestration: GPT-4o, Claude 3.5, Gemini Pro — routed by task type
- Proprietary fine-tuned models for domain-specific tasks (legal, finance, healthcare)
- On-premise and hybrid deployment for data-sensitive customers
- Automated red-teaming and bias audits on every model version release

7. 2026 Goals

ARR Target	\$42M ARR by December 2026
Customer Count	500+ paying enterprise customers
NPS Score	55+ (currently 48)
Uptime SLA	99.99% across all production services
AI Accuracy	>92% on RAG benchmark suite
New Markets	Launch in Japan and Brazil
Certifications	SOC 2 Type II, ISO 27001, FedRAMP Moderate

8. Success Metrics

Metric	Owner	Target	Cadence
Monthly Active Users	Product	50,000	Monthly
Customer Churn Rate	CS	< 2%	Monthly
P95 API Latency	Eng	< 400ms	Real-time
Model Accuracy (RAG)	AI Team	> 92%	Per release
Support CSAT	Support	> 4.5/5	Weekly
Deploy Frequency	DevOps	> 2/day	Daily
MTTR	SRE	< 30 min	Per incident
