

TechCorp Quarterly Engineering Roadmap

2026 Engineering Goals, Features & Hiring Plan

Version: v1.0

Document: TC-ROAD-010

TechCorp Internal

1. Q1 Goals (Jan–Mar 2026)

Initiative	Owner	Status	Priority
RAG v2 launch (hybrid search)	AI Team	Completed	P1
Multi-tenant RBAC overhaul	Platform	Completed	P1
Qdrant migration from Pinecone	Infra	Completed	P2
Python SDK v3.0 release	DX Team	Completed	P2
SOC 2 Type II readiness	Security	In Progress	P1
Grafana observability rollout	SRE	Completed	P2

2. Q2 Goals (Apr–Jun 2026)

Initiative	Owner	Status	Priority
Streaming API for RAG responses	AI Team	In Progress	P1
Analytics Engine beta	Data Eng	In Progress	P1
Document reranking v2 (ColBERT)	AI Team	Planned	P2
Japan region (ap-northeast-1)	Infra	Planned	P2
Prompt Registry v1.0	Platform	In Progress	P2
HIPAA compliance module	Security	Planned	P1

3. Q3 Goals (Jul–Sep 2026)

Initiative	Owner	Status	Priority
Multi-model routing engine	AI Team	Planned	P1
Analytics Engine GA release	Data Eng	Planned	P1

Brazil region (sa-east-1)	Infra	Planned	P2
Fine-tuning pipeline (internal)	AI Team	Planned	P2
Mobile SDK (iOS + Android)	DX Team	Planned	P3
Automated red-teaming framework	Security	Planned	P2

4. Q4 Goals (Oct–Dec 2026)

Initiative	Owner	Status	Priority
GovCloud FedRAMP Moderate ATO	Security	Planned	P1
Real-time collaboration features	Product	Planned	P2
Vector DB auto-scaling (Qdrant)	Infra	Planned	P2
ISO 27001 certification	Security	Planned	P1
\$42M ARR milestone push (Q4 sprint)	All	Planned	P1
2027 Roadmap planning	Leadership	Planned	P3

5. Major Features (Full Year)

- RAG Platform v2: hybrid search, reranker v2, streaming, evaluation dashboard
- Analytics Engine: real-time BI, custom dashboards, CSV/PDF export
- Multi-model Orchestration: intelligent routing between Claude, GPT-4o, Gemini
- Prompt Registry: versioned prompt store with A/B testing and rollback
- Fine-tuning Pipeline: customer domain-specific model fine-tuning via UI
- GovCloud Edition: FedRAMP Moderate deployment for US public sector

6. Technical Debt

Item	Impact	Effort	Target Quarter
Migrate Python 3.9 → 3.12	Medium	Low	Q1 (Done)
Remove legacy REST v1 API	High	Medium	Q2
Replace jQuery frontend components	Low	High	Q3
Consolidate 3 Celery queues → 1	Medium	Low	Q2
Migrate off Heroku Redis → ElastiCache	High	Medium	Q1 (Done)
Standardize logging to OpenTelemetry	Medium	Medium	Q2

7. Infrastructure Projects

- Kubernetes 1.30 upgrade (Q1 complete) → 1.31 target Q3
- Terraform 1.9 migration and module refactor — Q2
- FinOps initiative: 20% AWS cost reduction target via Reserved Instances + Spot — Q2
- Zero-downtime deploy rollout to all services using blue/green strategy — Q2
- Service mesh (Istio) evaluation for mTLS and traffic management — Q3
- Implement eBPF-based network observability (Cilium) — Q4

8. AI Improvements

Embedding Models	Evaluate and adopt text-embedding-3-large across all tenants (Q2)
Reranker	Deploy ColBERT v2 reranker — +8% precision on internal benchmarks (Q3)
Evaluation Suite	Expand RAGAS benchmark to 500 test cases (Q2)
Fine-tuning	Customer-specific fine-tuned models for top 10 enterprise accounts (Q3)
Multi-modal	Image + PDF visual understanding via GPT-4o Vision (Q4)
Agentic Features	Tool-calling agent framework for workflow automation (Q4)

9. Hiring Plan

Role	Team	Quarter	Headcount
Senior Backend Engineer	Platform	Q1	2
ML Engineer (RAG/Embeddings)	AI Team	Q1	1
Senior SRE	Infra/SRE	Q2	1
Data Engineer	Data Eng	Q2	2
Security Engineer	Security	Q2	1
Frontend Engineer	Product	Q3	2
AI Safety Researcher	AI Team	Q3	1
DevRel Engineer	DX Team	Q4	1
Engineering Manager	Platform	Q4	1

Total planned hires in 2026: 12 engineers + 1 manager = 13 headcount additions. All hiring gated on ARR milestones reaching within 10% of quarterly targets.
