

TechCorp Customer Escalation Process

Ticket Prioritization, SLA & Resolution Workflow

Version: v1.9

Document: TC-ESC-007

TechCorp Internal

1. Ticket Priority Levels

P1 – Critical	Production outage affecting multiple customers or data loss risk
P2 – High	Core feature broken; significant customer impact; no workaround
P3 – Medium	Partial functionality degraded; workaround exists
P4 – Low	Minor issue or cosmetic bug; business not impacted
P5 – Enhancement	Feature request or feedback; no service impact

2. SLA Levels

Priority	First Response	Update Cadence	Resolution Target	Business Hours
P1	15 minutes	Every 30 min	4 hours	24/7
P2	1 hour	Every 2 hours	8 hours	24/7
P3	4 hours	Daily	3 business days	Business hours
P4	8 hours	Weekly	10 business days	Business hours
P5	2 business days	As needed	Next quarter	Business hours

3. Escalation Matrix

Tier	Team	Handles	Escalates To
Tier 1	Support Agents	P3–P5, FAQ, account, billing	Tier 2 for P1–P2
Tier 2	Technical Support	P2–P3, API issues, integrations	Tier 3 for unresolved
Tier 3	Engineering	P1–P2, bugs, outages, data issues	VP Eng for Sev1
Tier 4	Leadership	Major incidents, legal, press	CTO / CEO

4. Incident Severity Classification

Sev 1	Full service outage OR data breach — all hands, war room
Sev 2	Partial outage affecting >10% of users — immediate engineering response
Sev 3	Degraded performance, single tenant affected — engineering ticket same day
Sev 4	Minor bug, no data loss — standard sprint process

5. Communication Templates

Initial P1 Response (within 15 min):

Subject: [URGENT] We're investigating your reported issue – Ticket #[ID] Hi [Customer Name], Thank you for reaching out. We've received your report and our engineering team is actively investigating. We'll provide a status update within 30 minutes.
Incident Commander: [Name] | Bridge: [URL] | Status Page: status.techcorp.io TechCorp Support Team

Resolution Confirmation:

Subject: Resolved – [Brief Description] – Ticket #[ID] Hi [Customer Name], We've resolved the issue affecting [describe impact]. Root cause: [brief RCA]. Prevention measures: [what we're doing to prevent recurrence]. A detailed post-mortem will follow within [X] business days.

6. Resolution Workflow

Step 1: Ticket created in Zendesk --> auto-assigned to Tier 1 queue
Step 2: Triage within SLA first-response time --> priority assigned
Step 3: If P1/P2 --> immediate escalation to Tier 2, Slack alert in #escalations
Step 4: Engineering creates JIRA ticket linked to Zendesk case
Step 5: Fix deployed --> customer notified with resolution note
Step 6: CSAT survey sent 24h after ticket closure
Step 7: P1/P2 incidents require 5-day post-mortem in Notion
