Welcome to Cobalt Iron!

Thank you for selecting Cobalt Iron Compass to protect your IBM Power VS environment. As the global leader in analytics-driven data protection, Cobalt Iron is dedicated to making your experience with the Cobalt Iron Support team a positive one in every regard.

This guide will assist you in understanding the world-class support that will be provided by the Cobalt Iron Support team.

The Support Guide offers a quick reference to:

- Incident Reporting
- Ticketing Process
- Incident Priority Levels
- Support Goals
- Ticket Escalation Process

Share this document with individuals or departments that may need to open an incident case with Cobalt Iron.

Thank you for your business.

Sincerely,

Brian Smith

Vice President of Operations
Cobalt Iron, Inc.

Cobalt Iron Compass® Support

Cobalt Iron Compass Support—which is included as a part of the Compass solution—provides setup and problem resolution assistance from highly trained Compass specialists via our ticketing system. Our Support team offers help with:

- Agent provisioning and reporting
- Agent schedules
- Policies and options
- Agent installation
- Agent protection event errors
- Any issue with the Compass Accelerators and associated storage

Compass Support is available during normal business hours, Monday through Friday, 8 a.m. to 5 p.m. CT, excluding U.S. holidays.

Customer tickets opened as urgent priority are responded to 24 x 7 x 365, as are Compass monitoring alerts for isolation of problems and identification of faults or errors in the solution.

The priority table details priority levels and anticipated response times.

Incident Reporting Process

If a customer requires assistance or is experiencing trouble with Compass, contact the Cobalt Iron Support team using one of these methods:

SUPPORT PORTAL

<https://support.cobaltiron.com> (login required)

- Create new tickets (selectable priority)
- Update active tickets
- View closed tickets

EMAIL

cisupport@cobaltiron.com

- Emails sent to this address create a new ticket automatically (normal priority)

Every request is issued a new ticket number which is used as an identifier for the issue. All communication and information regarding the issue is tracked by this active ticket. Every time the ticket is updated an email is sent to the requester and each person on the CC list. Updates can be made in the Support portal or by simply replying to the email delivered.

To facilitate and expedite troubleshooting, provide the following information in the Cobalt Iron Support ticket:

- | | |
|------------------------------|---|
| • Company name | • Time the problem occurred |
| • Name | • Corrective actions already taken |
| • Phone number | • Any supporting agent files (schedule or error logs, config or option files) |
| • Email address | |
| • Description of the problem | |

Cobalt Iron Support Ticketing Process

The goal of the ticketing process is to establish or restore normal service operation as quickly as possible and to minimize the adverse impact on business operations thus ensuring that the best possible levels of service quality and availability are maintained. The Cobalt Iron Support team is responsible for managing internal and external communications, directing response and diagnostic activities, and providing feedback to the customer.

INCIDENT DETECTION AND REPORTING

The act of learning an incident has occurred and recording the basic details relating to it. The Support team conducts a preliminary incident assessment, reviews the case details, and documents additional relevant information. Tickets are assigned a priority level (see Priority Table below) based on a combination of impact and urgency.

INCIDENT CLASSIFICATION AND INITIAL SUPPORT

Categorizes the incident, assigns a priority, assesses the details, provides initial customer support, and routes the incident to the appropriate team member.

INVESTIGATION AND DIAGNOSIS

Collects and analyzes the information, then prepares for resolution. The assessment continues to review all incident available data to identify appropriate responses and actions.

RESOLUTION AND RECOVERY

Performed once the issue is fully understood. Finding a resolution means that a way of rectifying the issue has been identified. The act of applying the resolution is the recovery phase. This stage focuses on establishing or returning the user's service to normal status.

TICKET CLOSURE

The act of confirming the resolution with the reporter of the incident. Tickets are closed on customer confirmation on resolution.

SHARED SESSION COLLABORATION

For some cases, it is necessary for the Support team to request some type of screen share capability to expedite resolution and ensure appropriate diagnosis of the ticket is implemented.

Priority Levels

In order for the Support team to understand the severity of the incident experienced, relevant information must be provided at the time the ticket is submitted via email or by logging in to the Support Portal.

PRIORITY LEVEL	DESCRIPTION
URGENT Service Outage <i>Services unavailable or Disaster Declaration made (data restoration assistance required)</i>	Concerns a major issue that inhibits a primary business function from operating as required. Requires rapid attention from the Cobalt Iron Support team. In this instance, a “primary business function” is taken to mean a file and system restore and recovery functions. This also includes Compass and Accelerator service outages or all backups or restores failing. Anticipated response time: 1 hour Availability: 24 x 7 x 365
HIGH Service Severely Impacted <i>Major impact on service</i>	Concerns a major issue greatly impacting customer’s business operations. Anticipated response time: 2 business hours Availability: Monday – Friday 8 a.m. to 5 p.m. CT, excluding U.S. holidays
NORMAL Service Impacted <i>Minor impact on service</i>	Concerns incidents or errors that can have minimal impact on the customer’s business. An issue that causes a performance reduction or degradation of customer services. Anticipated response time: 4 business hours Availability: Monday – Friday 8 a.m. to 5 p.m. CT, excluding U.S. holidays
LOW Configuration Change or Service Question <i>Non-service impacting</i>	Concerns configuration changes and general service and how-to questions. Also includes non-critical product improvements or desired modifications with no critical impact on the customer’s business. Anticipated response time: 8 business hours Availability: Monday – Friday 8 a.m. to 5 p.m. CT, excluding U.S. holidays

TECHNICAL SUPPORT GOALS

Our goal is to provide triage and resolution steps that meet the needs of customer business. The table above identifies our internal goals, which are monitored and measured on a regular basis.

Ticket Escalation Process

The customer may request hierarchical escalation during the Cobalt Iron Support process when it is likely that resolution of an incident will not be in a timely or satisfactory manner. Use the Support Ticketing system as the main point of communication, but use the escalation level list when necessary.
